
Remote Access

Launching the VPN Client

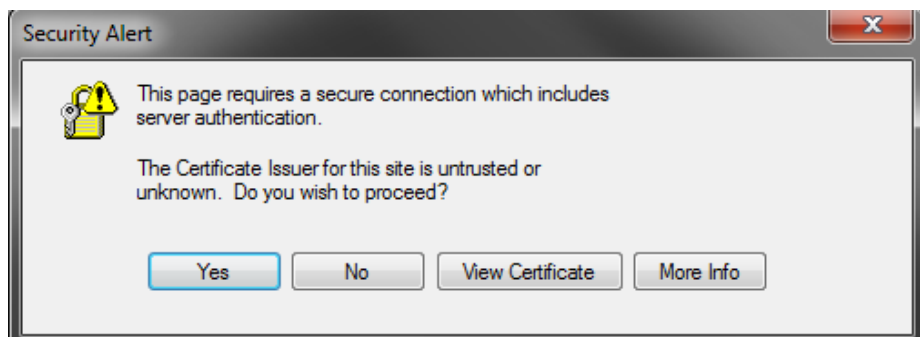

Once the VPN client has been successfully installed you can now login to the client.

Navigate to your Windows Start Menu then CISCO - Cisco AnyConnect VPN Client.

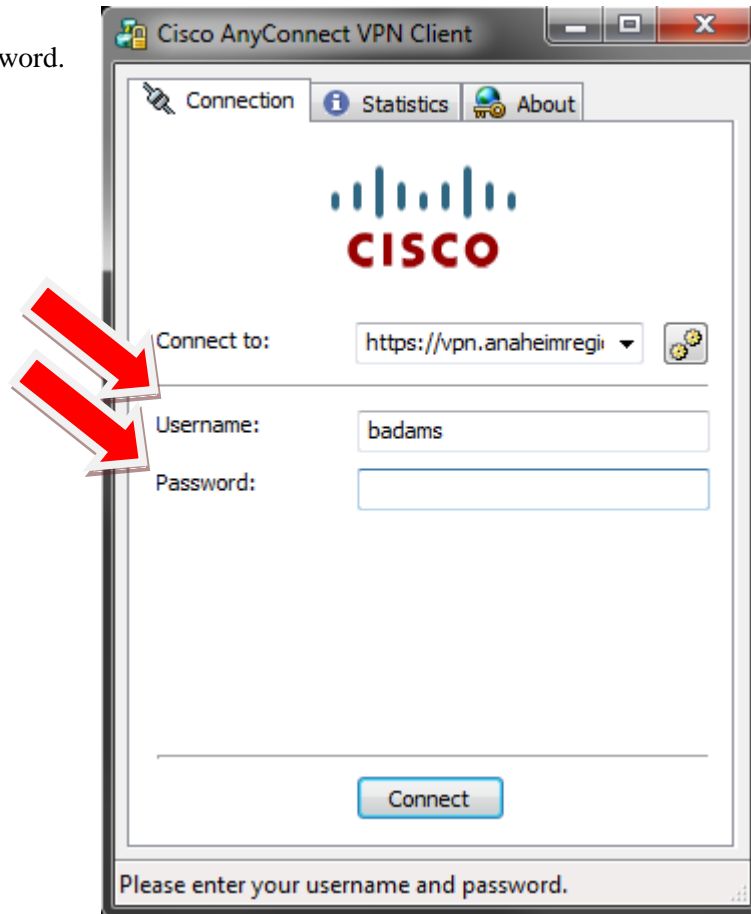

Launch the client.

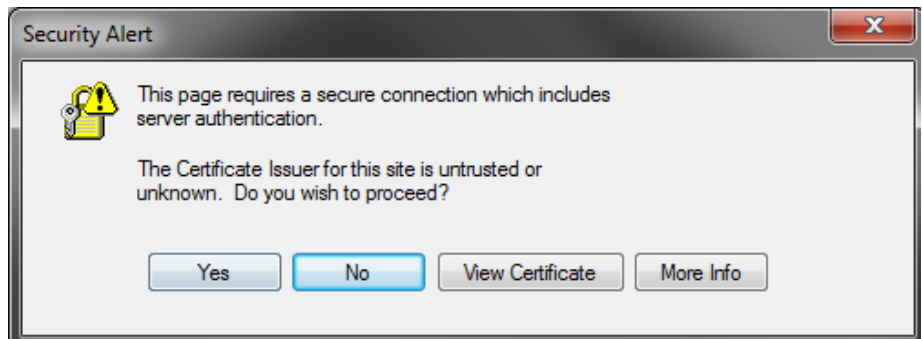

If you receive a Security Alert click on "yes" to continue.

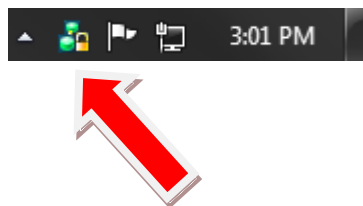

Enter your VPN username and password.

If you receive a Security Alert click on "yes" to continue.

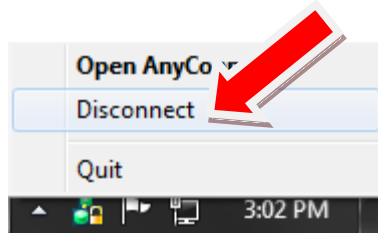

As soon as the lock appears on your toolbar you are now connected.

Logging out of the VPN Client

To log out of the VPN client follow the instructions below

At any point if you would like to log off of the VPN, right-click on the icon in your toolbar and click "disconnect"

Support
